The focus of the program is to improve participants' competence, congruence and confidence in doing transformational, experiential, systemic change therapy. The course leader will utilize lectorettes, small group discussions, structured exercises, demonstrations, experiential learning and skill practice sessions to assist participants to move their therapy into a positively directional, change focused, experiential process.

The emphasis will be on bringing about transformational change in individual therapy, couples therapy and family therapy. As well, some attention will be given to working with specific symptoms in therapy.

Participants will work in triads to practice different aspects of the program. As in the STST Level I training program, participants will use their own process of personal growth as the arena for their learning.

This program will include several voluntary therapeutic demonstrations with program participants.
